HIVE

WHAT IS HIVE?

Hive is a Web3-focused blockchain with a thriving ecosystem of diverse applications, communities, and projects. Hive hosts some of the most widely used Web3 applications in the world. Hive is an established platform with years of battle-tested technological innovation and wide-scale adoption.

WHAT CAN I DO ON HIVE?

There are many opportunities on Hive for developers and builders, for content creators, for artists and musicians, and for everyone in between. Everyone is welcome on Hive.

WHY HIVE?

- Fast and fee-less transactions
- Dapp-driven ecosystem
- Web3 social networks
- Unlimited scalability

HIVE IS GLOBAL

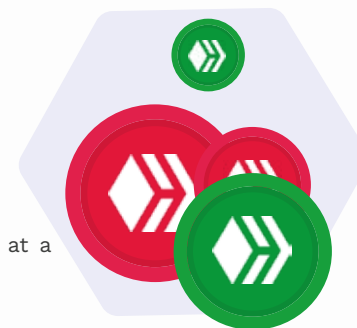

Hive is a decentralized blockchain protocol with a fast and scalable infrastructure. Its globally-distributed network covers the world and has been heralded as a safe and inclusive cryptocurrency gateway.

WEB3 IN A FEW WORDS

Web3 is the new internet era built around decentralized economies and trustless interactions. You control your assets, content and funds. The principles of Web3 are driven by the removal of barriers and true personal control over owned digital property.

HIVE ECONOMY

- HIVE**
Is the main liquid currency of the Hive blockchain.
- HBD (Hive Backed Dollar)**
Is a stablecoin pegged to the US Dollar at a steady value of \$1 USD.
- HIVE POWER**
HIVE that is staked through "powering up" is converted to Hive Power and can be used for governance or curation functions.

HIVE ECOSYSTEM

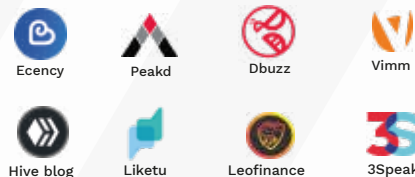

Hive has an ecosystem of diverse social networking dapps, communities, and games all based on its scalable blockchain and layered solutions. Hive is highly efficient and is designed to enable decentralized applications to run quickly and smoothly. Due to its fee-less system, Hive-based applications are accessible to everyone without any need for financial investment and appeal to a diverse audience.

SOCIAL MEDIA

One of the most interesting aspects of the Hive ecosystem are the Web3 social networks built on the blockchain. These differ from conventional social networks by incentivizing content creators through a blockchain-based economy in which the creators themselves control their rewards.

NFTs & GAMES

On Hive there are many exciting P2E (play to earn) games such as Splinterlands and Muterra. There are also awesome platforms including the NFT Showroom and DLUX to mint your unique NFTs.

- Content monetization
- Social networks
- P2E games
- Video and streaming
- Innovative DeFi
- NFTs and tokens
- Fee-less system
